CRITERIA-7

7.1.3 Quality audits on environment and energy regularly undertaken by the Institution.

Green/Environment Audit Report

The intent of conducting regular environmental audits within the institution is not only to consider an environment-friendly premises but to also encourage the staff and the students to work towards sustainable development. As it becomes increasingly harder for life to sustain on the planet, the college ensures that the youth is inspired towards safeguarding natural resources in order to pass on better environmental conditions to upcoming generations. The college has greenery surrounding it from all directions and takes numerous initiatives to ensure a clean, healthy and refreshing environment, with education going hand-in-hand with environment conservation.

The main objectives of organizing green audits are:

- Ensuring the environmental ethics and protocols are followed to ensure a clean, non-hazardous environment.
- Developing notions of respect towards nature and significance of all forms of life including flora as well as fauna to maintain an efficient ecosystem.
- Reduction and reuse of resources available and digitalization of documents to avoid wastage of paper.
- Environmental education through inclusion of EVS in the curriculum.

Introduction

The college was established under the aegis of Govt. of Uttarakhand at a serene and scenic site close to the confluence of Song and Bandal river in Maldevta (Raipur). The core objective of the college is to build an institute of higher learnings with a focus on skill development and capacity building, which aligns with the overarching interests of the country.

The Salient features of institution's environmental policies are as follows:

- Inculcation of environmental consciousness among the stakeholders to avoid pollution and abuse of resources.
- Avoidance of usage of plastics, adoption of rain water harvesting, proper solid waste management and other activities aimed at safeguarding nature.
- Optimal use of all natural resources and avoiding wastage.
- to ensure that the practices followed in the campus are in accordance with the Green Policy of the country.

Various works are done to maintain the green campus in our college.

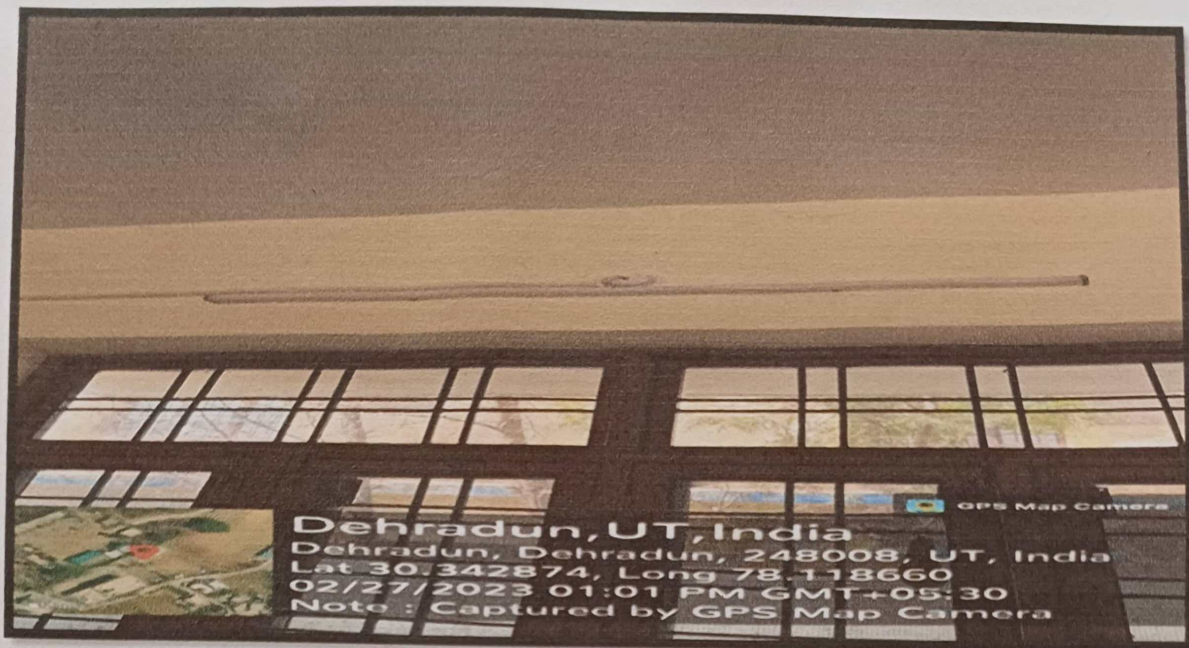

- There is a ban on the use of plastic bags in the college. There is a provision to throw disposable cups and glasses in the dustbin immediately.
- Plantation program is conducted in the college on the occasion of Harela and other national festivals.
- Smoking is strictly prohibited in the college campus.
- There are windows in the classrooms and in the entire college building, which allow natural light to enter. Efforts are made to reduce the use of tubelights and bulbs during the time. The college is making efforts in the direction of installing LED lights in the college .
- We all are living in the digital era, so efforts are made in the college to do the work online so that the use of paper can be minimized. For this, a whatsapp group (GPGC Maldevta, Dehradun) has been created in the college, on which necessary information, activities and notices related to the college are posted. Also, the college's email ID (raipurgcd@gmail.com) and samarth portal is used for submitting applications and other necessary interactions. Online study material is also available on the college website (<https://gpgcraipur.ac.in>) for the

students. In this way an attempt has been made to reduce the dependence on paper.

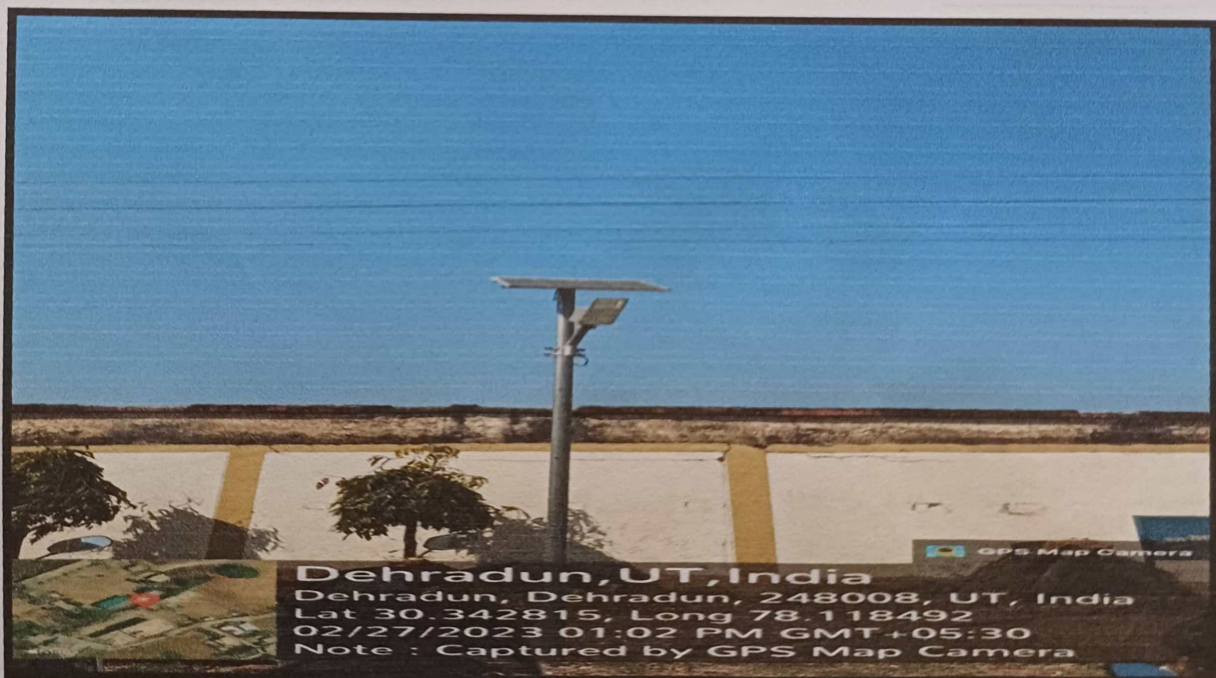

- The staff members are advised to take out the printouts only when required and use both the sides.
- Dustbins have been arranged at various places in the college such as library, offices, classes and staff rooms so that students can be made aware that they should not throw garbage here and there. There is a system for collecting and destroying everyday garbage like used paper, card sheet, rubber, waste plastic, cardboard material in the college. All efforts are made to destroy plastic and other elements which are harmful to the environment in order to ensure a plastic-free campus.
- Plumbing maintenance of Taps is done on regular basis to arrest wastage of water.
- The fire, electricity and water supply committee constituted in the college also takes care that there is no wastage of water.
- RO reject water is collected in buckets and used for watering plants and mopping.
- There is a system of pipelines and pits for the drainage of dirty water in the college (college canteen, toilets, wash basins). In this way, complete arrangements have been made to keep the college campus green and clean.
- To keep prevent unnecessary usage of electricity, students are advised to switch off the fans or switch off the lights when not required.
- Along with this, the paper of Environmental Studies is compulsory in the under graduation course of all faculty students and it is mandatory to pass the examination in the final year of graduation.

Energy management

LED lights use in college

solar light use in college campus
